

## Technical Note

Model: KS-2402 Ver.C

Subject: Port 25 Port 26 mini-GBIC LED Display

In the manual of KS-2402 product CD, the following description of Port 25 Port 26 mini-GBIC LEDs is incorrect.

### Page16: incorrect description

mini-GBIC

On	:	When the mini-GBIC module is installed, LED will light on.
Off	:	No mini-GBIC module is installed.

The LED should be On when the mini-GBIC (SFP) module is installed and the cable is link-up as described below:

### Page16: correct description

mini-GBIC

On	:	When the mini-GBIC module is installed & link up, LED will light on.
Off	:	No mini-GBIC module is installed.

The interpretations combining [mini-GBIC] LED and [Link/ACT] LED display are:

mini-GBIC	Link/ACT	Interpretation
On	On	The mini-GBIC module establishes an active link.
Off	On	The port RJ-45 has an active copper link.
Off	Off	No active link on both mini-GBIC and RJ-45
